

PROLOTHERAPY SUCCESS STORY

Name:

Date:

7/28/06

Briefly describe your condition and life prior to prolotherapy:

I suffered from various types of pain in many areas throughout my body.

Please share any successes you have had with your condition as a result of prolotherapy:

Dr. Alderman began treatment on my right knee and left ankle in February 2006. These were the worst problem areas for me, the knee due to arthritis and the ankle due to a sprain 18 months earlier that had never completely healed.

After a while, we added my lower back, then my right wrist and left thumb. All responded favorably to some degree, and I am happy to report that as of July 2006 I was able to discontinue the treatments on my first two areas (knee and ankle), as I was able to assess my improvement at the 95% level. Treatment on the other areas continues and I am confident they will continue to improve as well.

My visits are spaced at three to five week intervals, depending on my schedule, and I actually look forward to the 600-mile round-trip drive from Las Vegas to Glendale for my regular fix of Dr. A's "prolo magic."
